NASALIFYA SIMBEYE

SYSTEMS, INFRASTRUCTURE, SECURITY OPERATIONS & DIGITAL FORENSICS

Lusaka, Zambia | +260 969 995 015 | nasalifya@outlook.com | linkedin.com/in/nasalifyasimbeye | github.com/nasalifya | nasalifya.github.io

PROFILE

Computer Science graduate and ICTAZ-licensed ICT Professional with practical experience in systems administration, infrastructure and client support. I also hold a Certificate in Criminal Investigations and the Law from ZIALE, and recently completed a ZIALE course in Cybersecurity and Digital Forensics (certificate pending issuance), which together with my technical background let me work at the intersection of infrastructure, security and investigative procedure. I maintain a segmented server lab with Proxmox, Windows Server, Active Directory and dual-SIEM monitoring, and deploy and maintain a school management platform in active use. My studio IT experience includes user support, network troubleshooting, patching and backup assistance. I bring careful configuration, clear documentation and an operational focus to systems and security work.

EXPERIENCE

IT Specialist Intern | Oram Media Dynamics, Lusaka, Zambia | Dec 2024 - May 2026

- Provided day-to-day studio and office IT support: patch management, performance monitoring, and hardware and software troubleshooting for production and administrative staff
- Supported office connectivity across routers, switches and user devices, serving as the primary point of contact for technical issues
- Assisted with backup and recovery of project and footage files; maintained records of technical issues and fixes

Personal Home Lab, Parabellum | Systems Engineer (Self-Directed), Lusaka, Zambia | Oct 2025 - Present

- Built and maintain a Proxmox VE environment with Windows Server 2022, Active Directory and pfSense firewall rules across WAN, LAN, DMZ and LAB zones
- Manage DNS, DHCP, Group Policy, organisational units and domain-joined endpoints; perform health checks and verify system status after changes
- Deployed Wazuh and Splunk, built dashboards and queries for log analysis and alert triage, and documented configuration decisions and findings on GitHub

CLIENT SYSTEMS

Blessed Faith Academy — School Management System | Systems Administrator (Client Project) | 2026

- Deployed and maintain a cloud-based platform, including PostgreSQL/Supabase administration, user roles, access permissions and automated deployment pipelines
- Set up health checks, deployment verification and an audit-logged publishing workflow with version control to support accurate and traceable academic records

ACADEMIC PROJECT

NAegisQ — Quantum-Resistant Banking Security Framework

Final-Year Project, ZCAS University, 2025

- Worked on a banking security framework using post-quantum cryptography for encryption and signing, with Kyber and Dilithium algorithms described in the project documentation
- Set up the database and anchored transactions to an Ethereum blockchain environment for tamper detection, referencing ISO 27037 and PCI-DSS 4.0 as design context

TECHNICAL SKILLS

Systems Administration: Windows Server 2022, Ubuntu Server 24, Active Directory, Group Policy, organisational units, domain-joined endpoints, DNS, DHCP, patching and health checks
Infrastructure & Networks: Proxmox VE, pfSense firewall and routing, network segmentation, TCP/IP fundamentals, Nmap and Wireshark
Security Monitoring: Wazuh, Splunk, log analysis, alert triage and technical documentation
Client Operations: Network administration, hardware/OS/application troubleshooting, backup and recovery assistance, PostgreSQL administration, Git and GitHub

EDUCATION & COMPLETED CREDENTIALS

BSc Computer Science (Merit) | ZCAS University, Zambia | Graduated 2026
ICTAZ Practising Certificate: ICT Professional | Associate Member AS004337 | Valid to Dec 2026
Certificate in Criminal Investigations and the Law | Zambia Institute of Advanced Legal Education (ZIALE) | Awarded Jul 2026
ZIALE Certificate in Cybersecurity and Digital Forensics | Zambia Institute of Advanced Legal Education (ZIALE) | Completed Oct 2026 (certificate pending issuance)
TryHackMe: Cyber Security 101 and Pre-Security Path | Completed

PROFESSIONAL DEVELOPMENT

AWS Certified Solutions Architect – Associate | In Progress | Expected Q4 2026
CompTIA Security+ | In Progress | Expected Q2 2027
CISA (Certified Information Systems Auditor) | Planned
